- Boston
- Cleveland
- Indianapolis
- Pittsburgh

We deliver highly available solutions using a customized blend of managed services, data centers and network access.

• **Managed Services**

Expedient has a broad depth of knowledge in everything from Dedicated Managed Servers to full PCI-DSS Security Management. By leveraging Expedient's expertise companies may focus their in house resources on business specific applications and offload many of the everyday functions involved in running the IT infrastructure to Expedient. Through this type of partnership businesses receive a more highly available solution while recognizing a lower total cost of ownership.

• **Colocation Services**

With world-class data center facilities across the United States, Expedient provides SAS-70 Type II and PCI-DSS compliant environments across a total of more than 175,000 square feet of space. Expedient facilities are designed with environmental control systems, raised floor, fault-tolerant power plants, advanced fire detection and suppression systems and security enforcement. Many of the data centers are connected via 1Gbps and 10Gbps long haul fiber optic rings which enable easy data replication between disparate geographies.

• **Connectivity**

Expedient was one of the first to deploy large scale, wide-area Ethernet networks in the United States and we continue to be recognized as one of the foremost experts in providing scalable Ethernet solutions in a cost effective manner. We provide these solutions using both fiber optics and Ethernet over copper technologies, with bandwidth options ranging from 3Mbps to 10Gbps. Scalable solutions with the flexibility to meet just about any need.

“Expedient keeps you current with emerging technologies and expands your IT capabilities.”
